-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-50 is/are pending in the application.

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to a bladder (subcombination), classified in class 36, subclass 29.
 - II. Claims 16-29, drawn to a method of making a bladder, classified in class 12, subclass 146B.
 - III. Claims 30-35, drawn to footwear and a bladder (combination), classified in class 36, subclass 114.
 - IV. Claims 36-42, drawn to method of making footwear, classified in class 12, subclass 142P.
 - V. Claims 43-45, drawn to a bladder (subcombination), classified in class 36, subclass 29.
 - VI. Claims 46-50, drawn to a method of making a bladder, classified in class 12, subclass 146B.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II,IV,VI and I,III,V are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different

Art Unit: 3728

process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as the core and barrier layers can be joined by adhesive.

3. After applicant elects between the process and product then following restriction is applied:

4. If group II, IV and VI is elected then the following restriction is applied:

5. Inventions IV and VI are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the bladder of the combination does not require the chamber having a peel strength of at least 5 pounds per linear inch. The subcombination has separate utility such as a bladder used in a shoulder or knee pad. Group II will be examined with either one elected

6. If group I, III and V is elected then the following restriction is applied:

7. Inventions III and V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP §

Art Unit: 3728

806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the bladder of the combination does not require the chamber having a peel strength of at least 5 pounds per linear inch. The subcombination has separate utility such as a bladder used in a shoulder or knee pad. Group I will be examined with either one elected.

8. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

9. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). Other useful information can be obtained at the PTO Home Page at www.uspto.gov.
